COMBO PACKAGE TEACHER

We have a rich and prideful golden heritage. In ancient period, every Indian was transforming the knowledge through his own life sketch to other people of world. Therefore India was holding the educational leadership. And after independence we all are living with the dream to rotate the wheel of time to achieve the position of educational leadership again. But, actually the wheel of time is already rotated in the form of 21st century. In present era the technology and smart generation is knocking our door. In this situation, we have to create a COMBO PACKAGE TEACHER to achieve the goal – educational leadership who can form the new generation and above picture is the description of that combo package.

In picture the Rishi is the symbol of the person who transfers his own ability to society. Teachers should transfer their ability to student from their heart. Therefore in the picture energy source is transferring to heart i.e. the modern child caring, child centred & psychology based education. In present era technology has its own impor-tance . so, Rishi's left side is occupied with latest technology i.e. laptop. It shows that modern teacher should be techno savvy. Above all this piousness –the Indian way of life must be the foundation. And peacock's feather is the symbol of that pious-ness. It says that the teacher has to gain the piousness with moral values. Books are kept at the right side of Rishi to exhib-its the significance of reading. In modern internet age with students teachers are making the distance with books. But books gives correct knowledge & concen-tration . And to get and transfer the correct knowledge & concentration the teacher has to read the books.

In short, heart with Indian culture , head with divine knowledge through global skill should be the modern teach-er's perception to com-plete the mission to became global educa-tional leader.
