

Innovate to Enterprise - need of the hour

By,
Ms. J.P.Bharathi

How can we improve our talent or skill! We need constant and genuine thinking in the prime years of our life and dedicate ourselves to learn with enthusiasm. We should be able to understand that there is only one thing that can preserve or perish an individual and that is knowledge with skill. This way we need to protect ourselves by engaging in the right kind of education with values. To protect and preserve an individual we need right kind of educational institutions. These institutions can impart training in the required areas to enhance skill of an individual. The training, which will churn the thinking process in an Individual. If this is possible, by every Institution, we will be realizing the targeted results. We can Innovate 2 Enterprise.

Individual has to enhance his skill to perform better at every stage in his life. SKILL enhancement should be a commitment with confidence to perform and Evolve as a better person in one's life. It is a commitment with a purpose to make things possible with the available resources and opportunities. It is a happening of those impossible that are only possible with skill.

Just as the earth revolves around itself, we revolve around our own thoughts. We revolve to grow, develop and elevate or deter, diminish and eliminate ourselves. All this happens within the Pandora box – Our Mind!

SKILL enhancements have evolved various capsules to different groups of students. Along with university education an individual needs,

- *Learning Skills*
- *Communication Skills*
- *Positive Mental Attitude (PMA)*
- *Positive thinking*
- *Life Skills*
- *How to face challenges in life*
- *How to plan your studies*
- *How to excel in exams*
- *Behavioural problems*
- *Career Guidance*

Skill in an individual can be enhanced with the help of group discussions, games and other exercises. This way the focus can be on crucial life skills to make a performer perform better.

Skill enhancement also focuses on tailor-made, need based programs for specific age groups.

With this new approach towards learning, we can reach out to Individuals, students, Institutions, Organizations and the like. The results can be tremendous

and can sky rocket towards the betterment of human welfare. This is the need of the hour.
